

Activity Design

I. Nature of Activity

- a) Title : **Marinduque Innovation Fest 2026**
Theme: From Ideas to Solutions: Connect, Innovate, Transform
- b) Venue : Marinduque State University Gymnasium
Marinduque Innovation Hub – DOST Marinduque
- c) Time : 8:00 AM - 5:00 PM
- d) Target Date : October 26-30, 2026
- e) Amount Needed : DOST Marinduque - Php 800,000.00
MVINET - Php 123, 500.00

II. Rationale

The Marinduque Innovation Hub (iHUB), in partnership with the Marinduque Technology Business Incubator (MTBI), DevCon, Cybercraft Ph, and Erovoutika, proposes the conduct of the Marinduque Innovation Festival 2026, a multi-component event aimed at promoting innovation, entrepreneurship, technology development, and collaboration among students, innovators, startups, technology enthusiasts, and other stakeholders in Marinduque.

The festival will feature the official Launching of the Marinduque Innovation Hub (iHUB), complemented by a series of innovation-focused activities, including a Hackathon, Idea Pitching Competition, E-Sports Game Development Competition, Video Making Contest, technology forums and panel discussions, and technology exhibits. These activities are designed to provide participants with opportunities to develop and showcase innovative solutions, enhance their technical and entrepreneurial skills, foster collaboration, and connect with industry practitioners, technology organizations, and potential partners.

III. Objectives

General Objective

The Innovation Festival 2026 aims to promote innovation, technology development, entrepreneurship, and collaboration in Marinduque by providing a platform for innovators, students, startups, technology enthusiasts, academe, government, and industry stakeholders to showcase ideas, develop technology-driven solutions, and establish potential partnerships.

Specific Objectives

The Innovation Festival 2026 specifically aims to:

1. Officially launching the Marinduque Innovation Hub (iHUB) as a platform for supporting innovation, technology development, entrepreneurship, and collaboration in the province.
2. Provide participants with opportunities to develop and demonstrate innovative solutions through the Hackathon, Idea Pitching Competition, AI-based short film Creation and E-Sports Game Development Competition.
3. Enhance the technical, creative, entrepreneurial, and problem-solving skills of participating teams through hands-on innovation activities and competitions.
4. Expose participants to emerging technologies, industry trends, and innovation opportunities through forums, talks, and panel discussions with technology experts and practitioners.
5. Facilitate knowledge sharing and mentorship among students, innovators, startups, academe, government, industry, and technology communities.
6. Promote collaboration and networking among local innovators, technology organizations, business incubators, government agencies, and other stakeholders.
7. Provide a venue for showcasing innovative ideas, digital solutions, and technology-based projects developed by local participants and innovation stakeholders.
8. Identify and support promising technology-based ideas and potential startups that may be further developed through the programs and services of the Marinduque iHUB and its partner organizations.
9. Strengthen the local innovation ecosystem by encouraging continuous engagement, collaboration, and development of technology-driven solutions in Marinduque.

IV. Target Participants

The Marinduque Innovation Fest Challenge is open to:

- High school and college **students** from public and private schools within Marinduque.
- Participants shall compete in teams composed of three (3) members.
- Each team should designate a Team Leader and provide Coach/Mentor for communication.

Everyone is welcome to join the forums and panel discussions.

V. Methodology

MARINDUQUE INNOVATION FEST 2026

EGames Sports Development Challenge

Theme:
“Create. Play. Innovate”

I. Program Description

The **E-Games Sports Development Challenge** is a student-focused competition that encourages creativity, innovation, and technical skills through game development. Participants will design and develop an original game that demonstrates engaging gameplay, effective use of technology, and potential for real-world application.

II. Objectives

The challenge aims to provide students with an opportunity to showcase their game development skills, collaborate as a team, and present their innovative ideas and creations to a wider audience.

III. Eligibility

- Participants must currently be enrolled as high school or college students.
- Each participating team should be composed of a maximum of three (3) students accompanied by one (1) faculty coach or adviser.
- The coach will only provide mentorship and guidance throughout the competition.
- Only one (1) entry can be submitted per team for the competition.
- Each team shall designate one member as its **Team Leader/Authorized Representative**, who will serve as the primary contact person for the organizers.
- Participants must accomplish the official registration form and submit all required documents within the prescribed deadlines.
- Employees of DOST and members of the organizing committee are not eligible to join.

IV. Contest Theme

Participants must create a game using any known or unique gameplay mechanic that can be associated with the following themes:

- Smart City
- Disaster Risk Reduction and Management
- Climate Change
- Education
- Circular Economy
- Philippine Games and Sports
- Board Games / Brain Games

V. Competition Mechanics

A. Registration

1. Interested teams shall register through the **official registration form on or before October 6, 2026.**
2. Each group shall submit the names and contact details of its three (3) members and coach.

3. Student participants **below 18 years old shall submit the required Parent/Guardian Consent Form.**
4. Only one person (the designated Team Leader) is allowed to register the entire team using the provided form
5. **Registration link:** <https://forms.gle/w6VcDSBH4N5epufg8>

B. Rules and Guidelines

1. EGames Sports-Ready Gameplay

- The game can either be played in an Online or Local Area Network Setting.
- The game must have a Player-versus-Player (PVP) matches (e.g. 1v1, team vs team, free for all) or a Player-versus-Environment (PVE) with leaderboards (e.g. fastest completion time, highest score, survival mode or other similar mechanics).
- The game must feature skill-based or knowledge-based matches that can be completed in a reasonable time frame. It must have a way to determine the winner at the end of each match or round.

2. Platform

Participants must create and develop a game using any platform that permits the prototype to be played on a browser, personal computer, or mobile device without the purchase of subscription or license.

3. Tools and Game Engine

The game can be made from any programming language or can be made via game engines such as Flash, RPG Maker, Unity, Unreal Engine, Godot, etc.

4. Publication

The game must not have been previously published on any game distribution platform or application store such as Steam, Epic Games, Google Play Store, Apple App Store, itch.io, etc.

5. Prohibitions

The game must not contain the following:

- Material that violates or infringes another's rights, including but not limited to privacy, publicity, copyright, trademark, patent, or intellectual property and property related rights.
- Footage, images, or artworks not created by the team unless such footage, images, or artworks are included as part of the team's chosen game creation platform or the team has obtained all rights necessary to include such footage, images, or artwork as part of their entry to the competition.
- Material that is inappropriate, indecent, obscene, hateful, torturous, defamatory, slanderous, or libelous.
- Material that promotes bigotry, racism, hatred, or harm against any group or individual or promotes discrimination based on race, gender, religion, nationality, disability, sexual orientation, or age.
- Material that is unlawful, in violation of, or contrary to the laws or regulations in the Philippine jurisdiction.
- AI Generated content that violates any of the above.

VI. Code Originality and Integrity

- All game logic, mechanics, and source code must be created by the registered team members.
- The game's source code must be original and must not contain:
 - Code from previously published or submitted games in any other competition.
 - Code copied or adapted from other developers without permission.

- Code directly taken from open-source projects, tutorials, or templates that implement the core mechanics of the game.
- Personal code libraries may be reused only if:
 - They were created entirely by the member/s of the team.
 - They have never been part of a previously published or submitted game.
 - Any reused personal code must be declared during submission.
- Violations of these rules will result in disqualification or forfeiture of the prize if found guilty by the organizers and judges even after the competition.

VII. Use of Artificial Intelligence (AI)

Use of AI-generated code will only be allowed as an assistive tool such as for utility functions, boilerplates, etc. and not as a substitute for authorship of the core gameplay logic and narrative system. It shall be fully disclosed to the organizers and judges and does not reproduce or infringe upon existing copyright or open-source material.

If AI is used in the integration of games such as Large Language Models (LLM) or Generative AI, its usage must be disclosed and must not violate any of the restrictions mentioned above.

Participants who use AI in any part of their entry must ensure that its application adheres to the following ethical standards:

- Clearly disclose all AI tools or models used, including their specific function or purpose, in the official submission form;
- Ensure that the entry reflects originality and substantial creative input beyond AI-generated content;
- Guarantee that any AI-generated elements do not infringe on intellectual property rights; and
- Comply with a content review process, during which the Organizing Committee may request additional documentation or clarification regarding the extent of AI usage.

The Organizing Committee reserves the right to disqualify any entry that fails to meet these ethical guidelines.

Use of AI may also affect the evaluation of entries. Point deductions, if applicable, shall be at the sole discretion of the judges based on the degree of AI involvement and its impact on the originality and creative quality of the entry.

VIII. Submission and Requirements

1. The teams must upload their entries through the provided link or scan the QR code on or before October 16, 2016.

Submission link: <https://forms.gle/dpD5STaJVaaa1HjHA>

2. Submission shall include the following:
 - a) Form 01: List of team members, Game Title and Synopsis – a short write-up limited to 500 words describing the game including its mechanics/gameplay.
 - b) Form 02: Asset and AI Usage Disclosure (Not applicable for those with fully original entries)
 - c) Game Trailer – a 1-2 minute video teaser of the game that can be played in loop during events related to the competition.
 - d) Prototype/Demo – a 3–5-minute video recording of the gameplay in an .mp4 format. Video may include an explanation on how the game works (can be voiced or have closed captions/subtitles)

e) Promotional Poster - 2 feet × 3 feet (24 × 36 inches), showcasing the proposed e-games concept, highlighting its key features, unique value, and potential benefits to players and the community.

All entries and required documents shall be uploaded to a Google Drive folder. Participants shall submit only the Google Drive link to the Organizing Committee for evaluation. The Committee shall review and verify all submissions to ensure compliance with the prescribed requirements. All entries shall undergo a pre-screening process prior to qualification for the competition.

IX. Judging Criteria

The competition shall follow a **two-stage judging process**:

1. Pre-Screening/Shortlisting

1. All submitted entries shall undergo an initial screening by the designated **Initial Screening Panel/Organizing Committee**.
2. The purpose of the initial screening is to identify the **Top Five (5) Finalists**.
3. The initial screening will use a standardized scoring rubric.
4. Whenever practicable, entries shall be identified by **entry codes rather than team names, schools, or participant names** during scoring to minimize bias.
5. Initial screening scores shall not be disclosed to the final judges.
6. The **five (5) entries with the highest consolidated scores** shall advance as finalists.
7. The organizers shall notify the selected and non-selected groups on **October 21, 2026**.

The initial screening shall focus on the overall merit and suitability of the entries for advancement to the final round.

Completeness (20%)	• The game is functional, stable, and free from critical errors and bugs. • Game has a premise/plot if applicable. If not, there is detailed documentation about entering the game and ending the game. • Game is made ready for commercialization or for public use. • All core mechanics and required features are implemented. • The game includes instructions, a tutorial, or onboarding so that new players can understand how to play. • The game is polished and ready for presentation.
Theme Relevance (20%)	• The game captures the essence of the competition's official themes • The game's core idea or storyline clearly reflects one or more of the competition's themes. • The game effectively communicates or raises awareness about the chosen theme's goals, values, or lessons
Originality (20%)	• Game logic, mechanics, and source code must be created by the registered team members. • The game has an identity, something that makes the game worth browsing or viewing from a public standpoint. • Creative integration of Philippine culture and/or traditions into its theme, story, characters, or setting.
Gameplay (20%)	• Gameplay mechanics are intuitive, smooth, responsive, easy to learn or master. • The game has a basic and working user interface. If there are many gameplay modes, it must be easily navigated. • Game has a progressive game loop that is both challenging and enjoyable.

	• Game mechanics can be derived from pre-existing games but can be added with different twists. Unique and innovative gameplay is highly encouraged. • Incorporates or showcases modern technologies (e.g., advanced physics, networking solutions, procedural generation, augment reality, AI-based features, or other innovative tools) that enhance the gameplay experience.
Aesthetics and Creativity (20%)	• Game has a visually appealing art style, visual effects, and colors that matches the game's theme. • Game has a decent sound design in which music, sound effects, and voice casting that create an immersive gaming environment. • The graphics and sound must be of high quality.
TOTAL: 100%	

The initial screening panel shall use a common scoring guide to promote consistency among evaluators.

X. Final Judging

1. **The five (5) finalists** shall proceed to the final judging which will be conducted in the last week of October.
2. The chosen finalists will present their developed game during the Game Demonstration.
3. Final judging shall be conducted by a separate set of judges.
4. Final judges shall independently evaluate the five teams using the official final judging rubric.
5. Final judges shall not be provided with the initial screening scores.
6. The final judging results shall determine the Champion, First Runner-Up, and Second Runner-Up.
7. The decision of the final judging panel, subject to the official rules and procedures, shall be final.

The five finalists shall be evaluated based on the following:

Gameplay (25%)	• Gameplay mechanics are intuitive, smooth, responsive, easy to learn or master. • Game has a basic and working user interface. If there are many gameplay modes, it must be easily navigated. • Game has a progressive game loop that is both challenging and enjoyable. • Game mechanics can be derived from pre-existing games but can be added with different twists. Unique and innovative gameplay is highly encouraged. • Incorporates or showcases modern technologies (e.g., advanced physics, networking solutions, procedural generation, AI-based features, or other innovative tools) that enhance the gameplay experience.
EGames Sports Potential (25%)	• The game is designed to support competitive gameplay • The game has balanced mechanics to avoid unfair advantage to one or more player/s or team/s. • Rules for winning/losing are easy to understand. • The game is replayable, giving the players different ways or strategies to win the game. • Gameplay is exciting and understandable for spectators/viewers
Graphics and Art (15%)	• Game has visually appealing art style, visual effects, and colors that matches the game's core theme. • Colors complement the game's user interface and must be accessible and inclusive for all types of users.

	Utilization of 3D and 2D art is highly encouraged as long as its high quality and does not affect the overall game experience.
Music and Sound Design (15%)	- Game has a decent sound design in which music, sound effects, and voice casting that create an immersive gaming environment. - Music and other sound elements must complement with the game environment and must show the necessary emotion when playing with such sounds.
Creativity and Innovation (20%)	- Game has innovative, novel, or unique mechanics that will be appealing for gamers. - Game has a creative theme that can capture different emotions of gamers.
TOTAL: 100%	

XI. Scoring Rubrics

Initial Screening Scoring Rubrics

Criteria	Excellent	Good	Fair	Poor
Completeness (20%)	18–20 All required game components, mechanics, instructions, documentation, and features are fully implemented; game is functional, stable, polished, and ready for presentation or public use.	15–17 Most required components and features are implemented and functional, with minor issues that do not significantly affect the game experience.	11–14 Several required components or features are incomplete or have noticeable issues affecting functionality or presentation.	0–10 Major components or required features are missing, non-functional, or incomplete.
Theme Relevance (20%)	18–20 Game strongly reflects the official theme(s) through its concept, storyline, gameplay, or overall experience.	15–17 Game clearly incorporates the theme with minor gaps in its integration.	11–14 Game shows some connection to the theme, but integration is limited.	0–10 Game has little or no clear connection to the theme.

Originality (20%)	18–20 Game demonstrates a highly original identity, mechanics, concept, and creative integration of Philippine culture and/or traditions; all core game content is created by the registered team.	15–17 Game demonstrates originality with distinct creative elements and appropriate cultural integration.	11–14 Game has some original elements but relies considerably on familiar concepts or mechanics.	0–10 Game shows limited originality or contains significant reliance on existing content or concepts.
Gameplay (20%)	18–20 Gameplay is intuitive, smooth, responsive, enjoyable, and progressively challenging, with effective mechanics, navigation, and meaningful use of technology.	15–17 Gameplay is functional and enjoyable, with generally smooth mechanics and navigation and some innovative elements.	11–14 Gameplay is functional but has noticeable issues in mechanics, navigation, balance, or engagement.	0–10 Gameplay is difficult to understand, poorly functioning, or lacks meaningful interaction and engagement.
Aesthetics and Creativity (20%)	18–20 Game has a cohesive and appealing visual style, high-quality graphics and effects, and immersive sound design that complement the theme and gameplay.	15–17 Game has good visuals and sound that generally complement the overall gaming experience.	11–14 Visuals and sound are adequate but have noticeable inconsistencies or quality limitations.	0–10 Visual and audio elements are minimal, poorly executed, or significantly detract from the gaming experience.

Final Judging Scoring Rubrics

Criteria	Excellent	Good	Fair	Poor
----------	-----------	------	------	------

Gameplay (25%)	23–25 Gameplay is highly intuitive, smooth, responsive, and engaging, with a well-designed interface, progressive game loop, and effective use of technology to enhance the experience.	19–22 Gameplay is smooth and enjoyable, with a functional interface, clear mechanics, and some innovative or technological elements.	15–18 Gameplay is functional but has noticeable issues in mechanics, navigation, progression, or responsiveness.	0–14 Gameplay is difficult to understand or navigate, poorly functioning, or lacks meaningful interaction and progression.
E-Games Sports Potential (25%)	23–25 Strong potential for competitive play, with balanced mechanics, clear winning/losing conditions, replayability, strategic depth, and strong spectator appeal.	19–22 Good potential for competitive play, with generally balanced mechanics, clear objectives, replayability, and understandable gameplay for spectators.	15–18 Some potential for competitive play, but balance, replayability, strategy, or spectator experience needs improvement.	0–14 Limited potential for competitive play due to unclear rules, poor balance, limited replayability, or weak spectator appeal.
Graphics and Art (15%)	14–15 Highly appealing and cohesive visual style, with quality graphics, effects, and accessible colors that complement the game's theme and interface.	11–13 Good visual design and quality graphics that generally complement the game's theme and user interface.	7–10 Visual elements are adequate but have noticeable inconsistencies or limitations in quality, accessibility, or overall design.	0–6 Visual design is minimal, inconsistent, or significantly affects the overall gaming experience.
Music and Sound Design (15%)	14–15 Music, sound effects, and voice elements are well-integrated, high-quality, and effectively enhance the game environment, emotion, and immersion.	11–13 Sound elements are appropriate and contribute positively to the overall gaming experience.	7–10 Sound design is functional but has noticeable gaps in quality, integration, or consistency.	0–6 Sound elements are minimal, poorly integrated, or detract from the gaming experience.

Creativity and Innovation (20%)	18–20 Demonstrates highly creative, novel, and distinctive mechanics or concepts with strong potential to engage and appeal to gamers.	15–17 Shows creativity and innovation through distinctive mechanics, concepts, or presentation.	11–14 Contains some creative elements but largely relies on familiar mechanics or concepts.	0–10 Shows limited creativity or innovation, with little distinction from existing games.
---------------------------------	---	--	--	--

VII. Tie - Breaking Rule

Initial Screening

In the event of a **tie in the final scores**, the winner shall be determined **based on the higher score in the following criteria, in order of priority**:

1. **Gameplay**
2. **Aesthetics and Creativity**
3. **Originality**
4. **Theme Relevance**
5. **Completeness**

If a tie still exists after applying the above criteria, the Screening Panel shall deliberate and determine the winner based on the overall merit of the game, in accordance with the Guidelines and Mechanics. The decision of the Screening Panel shall be final and irrevocable.

Final Judging

In the event of a **tie in the final scores**, the winner shall be determined **based on the higher score in the following criteria, in order of priority**:

1. **Gameplay**
2. **E-Games Sports Potential**
3. **Creativity and Innovation**
4. **Graphics and Art**
5. **Music and Sound Design**

In the event of a tie after applying the prescribed criteria, the Panel of Judges shall deliberate based on the overall merit, competitive potential, technical execution, creativity, and overall quality of the e-games entry. The decision of the Panel of Judges shall be final and irrevocable.

VIII. Prizes and Recognition

The following awards shall be given:

Award	Prize
Champion	₱10,000
First Runner-Up	₱5,000
Second Runner-Up	₱3,000

Awardees shall also receive **medals**. The awarding ceremony shall be held in the last week of October as part of the Marinduque Innovation Fest 2026.

All shortlisted qualifiers who successfully present their research during the event will receive a Certificate of Participation to acknowledge their contribution to the event.

IX. Conflict of Interest and Impartiality

- All judges and screeners shall be required to declare any actual, potential, or perceived conflict of interest involving a participating team.
- A judge/screener with a conflict of interest shall recuse themselves from evaluating the concerned entry, subject to the procedures determined by the organizers.
- Judges and screeners shall evaluate entries independently and shall not disclose or discuss their scores with other evaluators during the evaluation period.
- Initial screening scores shall remain confidential and shall not be used by the final judges in determining the winners.

X. Organizer's Decision

The organizers reserve the right to:

1. Verify the authenticity, originality, and compliance of submitted entries;
2. Request additional documentation or evidence from participating teams;
3. Disqualify entries found to be in violation of these Guidelines and Mechanics;
4. Make necessary interpretations or clarifications regarding provisions not specifically covered herein; and
5. Take appropriate action in cases of unforeseen circumstances affecting the conduct of the competition.

All decisions of the organizers concerning eligibility, compliance, and contest administration shall be final. The decision of the Final Judging Panel regarding the ranking of finalists shall be final and irrevocable, subject to verification of compliance with the competition rules.

XI. Timeline

DATE	ACTIVITY
October 6, 2026	Registration Deadline
October 16, 2026	Deadline for submission of final game and required documents
October 8, 2026	Boothcamp
October 17–20, 2026	Initial screening and evaluation
October 21, 2026	Announcement/notification of five (5) finalists

XII. Contact Information

For questions regarding the submission guidelines or the iHub launch event, please contact:

MARINDUQUE INNOVATION FEST 2026

Innovation Fest Hackathon

Theme:

“Code for Marinduque: Innovate, Create, Transform”

I. Program Description

The **Marinduque Innovation Fest 2026 Hackathon** is a collaborative innovation activity that brings together students, developers, designers, and innovators to create technology-driven solutions to local challenges in Marinduque. Participants will work in teams to develop and pitch innovative solutions within a given timeframe, supported by mentors and technical experts. The activity aims to foster creativity, collaboration, problem-solving, and the development of practical solutions using emerging technologies.

II. Objectives

General Objective:

To foster innovation, creativity, and collaboration among students, developers, entrepreneurs, and technology enthusiasts by developing technology-driven solutions that address actual challenges and opportunities in Marinduque.

Specific Objectives:

1. Identify local challenges that can be addressed through technology and innovation.
2. Develop innovative solutions through collaborative problem-solving.
3. Enhance technical skills in programming, design, AI, and emerging technologies.
4. Promote collaboration among students, developers, startups, academe, and government.
5. Strengthen the local innovation ecosystem through mentoring and networking.
6. Showcase promising prototypes with potential for further development and adoption.
7. Encourage sustainable innovation that benefits Marinduque communities.

III. Eligibility

- Each participating team must be composed of exactly three (3) members and one (1) coach/mentor.
- The coach will only provide mentorship and guidance throughout the competition.
- All members must be currently enrolled high school or college students in any educational institution located in Marinduque.
- Teams can be composed of individuals of mixed genders and from different academic programs.
- There is no age limit for participation.
- Submissions must represent original research or conceptualized prototypes developed by the proponents.
- The group should submit only one (1) entry to participate in the competition.
- Each team shall designate one member as its Team Leader/Authorized Representative, who will serve as the primary contact person for the organizers.
- Participants must accomplish the official registration form and submit all required documents within the prescribed deadlines.
- Employees of DOST and members of the organizing committee are not eligible to join.

IV. Contest Theme

Theme: ***Code for Marinduque: Innovate, Create, Transform***

Participants are required to develop an original and innovative prototype aligned with the provided theme, focusing on addressing relevant local challenges and demonstrating the potential of technology to provide practical, sustainable, and impactful solutions for the community. The team may explore these fields, but is not limited to:

- Agriculture & Food Innovation
- Disaster Risk Reduction/ Climate Change Adaptation
- Blue Economy & Marine Innovation
- Digital Technology & AI
- Health & Wellness Innovation
- Tourism & Cultural Innovation
- Creative Technology & E-Sports Game
- Governance & Smart Communities

V. Contest Mechanics

A. Registration

1. Interested teams shall register through the **official registration form on or before October 6, 2026.**
2. Each group shall submit the names and contact details of its three (3) members and coach.
3. Student participants **below 18 years old shall submit the required Parent/Guardian Consent Form.**
4. Only one person (the designated Team Leader) is allowed to register the entire team using the provided form.
5. **Registration link:** <https://forms.gle/LZJ2Y7p3EqPaZ5V86>

B. Entry Submission

1. Proposal and Other Requirements

- Each team is required to submit the following:
 - **Curriculum Vitae (CV) of each team members**
 - **Official Group Photo of Team**
 - i. Submit one (1) portrait and one (1) landscape group photo.
 - ii. Use a plain white background with good lighting.
 - iii. Ensure all team members are shown full-body, with faces clearly visible and unobstructed.
 - iv. Photos must be clear, high-resolution, and properly framed.
 - v. Avoid excessive filters, effects, or heavy editing.
 - vi. Wear appropriate and presentable attire; team shirts/uniforms are encouraged, if applicable.
 - vii. Submit photos in JPG or PNG format.
 - **Proposal**
 - i. All submissions must adhere to standard academic writing conventions and include the following sections.
 1. Document Format:
 - a. Paper Size: A4 paper

- b. Font: Time New Roman, 12 pt.
- c. Spacing and Margins: Double Spacing, standard 1-inch margins
- d. File Format: Must be in PDF format.
- 2. Proposal Structure:
 - o Title Page: Project title, team name, and contact details of all members.
 - o Abstract: A brief overview of the problem, the proposed solution, and the target impact.
- ii. Note: No prototype is required during the initial submission. Teams are only required to submit their concept and supporting documents at this stage.
- o **Submission link:** <https://forms.gle/oE93tCN8h1YjBJuX7>
- o **Deadline: October 16, 2026**
- o Late submissions will not be accommodated to ensure ample time for the screening process.

C. Initial Screening

1. All submitted documents shall undergo an initial screening by the designated Initial Screening Panel/Organizing Committee.
2. The purpose of the initial screening is to identify the **Top Five (5) Finalists**.
3. The initial screening will use a standardized scoring rubric.
4. Whenever practicable, entries shall be identified by entry codes rather than team names, schools, or participant names during scoring to minimize bias.
5. Initial screening scores shall not be disclosed to the final judges.
6. The five (5) entries with the highest consolidated scores shall advance as finalists.
7. The organizers shall notify the selected and non-selected groups on **October 21, 2026**.

The initial screening shall focus on the overall merit and suitability of the entries for advancement to the final round.

Criteria	Weight
Team Capability & Technical Skills	25%
Problem Identification & Relevance	25%
Proposed Solution & Innovation	20%
Technical & Business Viability	15%
Clarity & Completeness of Submission	15%
TOTAL	100%

The initial screening panel shall use a common scoring guide to promote consistency among evaluators.

D. Webinar Bootcamp Attendance

- o Registered participants **must attend the Webinar Bootcamp on Design Thinking and Idea Pitching**. The bootcamp will be organized by the Organizing Committee, and the details will be provided once finalized.
- o The bootcamp will be conducted on either **October 8, 2026**. Final details will be communicated via email.
- o Teams may refine and enhance their concepts based on the knowledge and insights gained

during the bootcamp. The **final proposal must be submitted on October 16, 2026**. After the submission deadline, **no changes, revisions, or introduction of new concepts will be allowed**.

VI. Use of Artificial Intelligence (AI)

Use of AI-generated code will only be allowed as an assistive tool such as for utility functions, boilerplates, etc. and not as a substitute for authorship of the core gameplay logic and narrative system. It shall be fully disclosed to the organizers and judges and does not reproduce or infringe upon existing copyright or open-source material.

If AI is used in the integration of games such as Large Language Models (LLM) or Generative AI, its usage must be disclosed and must not violate any of the restrictions mentioned above.

Participants who use AI in any part of their entry must ensure that its application adheres to the following ethical standards:

- Clearly disclose all AI tools or models used, including their specific function or purpose, in the official submission form;
- Ensure that the entry reflects originality and substantial creative input beyond AI-generated content;
- Guarantee that any AI-generated elements do not infringe on intellectual property rights; and
- Comply with a content review process, during which the Organizing Committee may request additional documentation or clarification regarding the extent of AI usage.

The Organizing Committee reserves the right to disqualify any entry that fails to meet these ethical guidelines.

VI. Contest Proper (In-House Rules and Guidelines)

1. Instructions During Contest

- A formal draw will be conducted to determine the specific sector or field that each team will focus on.
- Teams are tasked with brainstorming and conceptualizing their own tech-business Information System (IS).
- The final output must be a fully working prototype of an Information System, specifically an App or Website.

2. The Hackathon Environment & Logistics

- The development phase of the competition will run for two (2) days inside Marinduque State University.
- Participants are permitted to conceptualize and develop their systems strictly between 1:00 PM to 5:00 PM on day 1 and 8:00 AM to 5:00 PM on day 2.
- **Logistics Note:** Due to budget constraints, no overnight accommodation will be provided; participants are expected to go home after the 5:00 P.M. cutoff. Lunch and snacks will be provided during the event.
- **Strict Confinement:** During the designated daily working hours, participants are strictly prohibited from leaving the venue premises except for health breaks or other authorized purposes.
- **Mentorship:** Each team will be assigned one (1) official mentor during the event to guide their

conceptualization and development.

- No spectators are allowed in the venue premises

3. Development Restrictions & Monitoring

- **Software & Hardware:** Teams will use any software in creating their prototype using their personal laptops. GitHub/GDrive will be used to track the team's progress.
- At the end of each day, the assigned facilitator must be given access to the team's GitHub/GDrive repository to track their progress.
- **No Cellphones:** The use of mobile phones is strictly prohibited during the development phase.
- **Use of AI is Allowed:** The use of Artificial Intelligence (AI) tools (e.g., ChatGPT, Copilot, etc.) to generate code or ideas is allowed.
- **From Scratch:** All coding, database creation, and UI/UX designing must be built entirely from scratch during the two (2)-day duration. Pre-existing projects will not be accepted.
- Changing or writing codes outside the allotted daily time limit is strictly prohibited.
- All violations of these rules will be subject to disqualification from the competition.

4. Pitching Proper

- Finalists will present their idea live before the Board of Judges and an audience during the Marinduque Innovation Fest 2026.
- The Finalists shall prepare a **Pitch Presentation Deck** highlighting the identified problem, proposed solution, science, technology, and innovation (STI) component, implementation approach, and expected community impact of their proposed innovation.
 - The use of prototypes, demonstration models, videos, and other supporting materials are required.
- Each team shall be allotted:
 - Seven (7) minutes for the Innovation Pitch; and
 - 13 minutes for the Question-and-Answer Session.
- Following the pitch, the BOJ shall ask questions; any team member may answer during this portion.

5. FILING OF PROTEST ABOUT THE RESULTS

- The team mentor or representative shall only file a protest within 30 minutes after the competition proper is over in the form of a letter sent to pstc.marinduque@mimaropa.dost.gov.ph.
- Protests shall only be entertained after the competition.
- The decision of the BOJ is final and irrevocable.

VII. Output Specification

Participants are expected to submit the following outputs:

1. **Working Prototype** – A functional prototype that addresses the identified problem and is aligned with the hackathon theme.
2. **Project Documentation** – A brief document describing the problem, proposed solution, key features, technology used, and potential impact.
3. **Source Code/Technical Files** – Complete source code and other necessary files used to develop the prototype.
4. **Pitch Deck** – A presentation highlighting the problem, solution, target users, innovation, business/sustainability potential, and impact.
5. **Prototype Demonstration** – A live demonstration showcasing the prototype's key features and functionality.
6. **Final Pitch Presentation** – A short presentation to the panel of judges explaining the solution, its uniqueness, feasibility, and potential contribution to Marinduque.

VIII. Submission Requirements

A. Registration Stage — Deadline: October 6, 2026

- Accomplished Registration Form;
- Names and details of the three team members and mentor/coach;
- Team Leader/Authorized Representative; and
- **Parent/Guardian Consent Form** for participants below 18 years old;

B. Initial Screening Documents Submission - Deadline: October 16, 2026

- Curriculum Vitae
- Official Group Photo
- Proposal / project concept

IX. Criteria for Final Judging

Criteria	Weight	
Relevance to the theme: - Agriculture & Food Innovation - Disaster Risk Reduction/ Climate Change Adaptation - Blue Economy & Marine Innovation - Digital Technology & AI - Health & Wellness Innovation - Tourism & Cultural Innovation - Creative Technology & E- E-Sports Game - Governance & Smart Communities	25%	Agriculture and Food Innovation – This sector focuses on innovative solutions that improve agricultural productivity, food production, processing, and sustainability. Ideas may include smart farming technologies, precision agriculture, agricultural automation, food processing and preservation, post-harvest technologies, aquaculture, and the development of value-added agricultural products. Blue Economy and Marine Innovation – This sector focuses on the sustainable use, protection, and development of

	marine and coastal resources. Proposed innovations may address marine aquaculture, fisheries, coastal resource management, marine biodiversity monitoring, ocean technologies, and sustainable livelihood opportunities for coastal communities. Environment and Climate Innovation – This sector encourages solutions addressing environmental challenges, climate change, and disaster risks. Ideas may include waste management, recycling and circular economy initiatives, renewable energy applications, biodiversity conservation, climate change adaptation, disaster risk reduction, and technologies that promote environmental sustainability. Digital Technology and Artificial Intelligence – This sector focuses on the development and application of digital technologies to address real-world problems. Participants may propose innovations involving artificial intelligence, mobile and web applications, Internet of Things (IoT), automation, data analytics, cybersecurity, digital platforms, and other emerging technologies. Health and Wellness Innovation This sector focuses on innovative solutions that improve healthcare services, health monitoring, wellness, and quality of life. Ideas may include digital health applications, remote health monitoring, assistive technologies, community health solutions, nutrition innovations, and technologies that improve access to healthcare services. Tourism and Creative Innovation This sector promotes innovative ideas that enhance tourism, culture, heritage, and creative industries. Proposed solutions may include smart tourism platforms, digital tourism experiences, cultural heritage preservation technologies, augmented or virtual reality applications, creative media, animation, and innovative ways of promoting local destinations and products. Creative Technology and E-Games
--	--

		Innovation – This sector focuses on the use of technology to develop creative digital products and experiences. Participants may propose innovations involving game development, animation, augmented reality (AR), virtual reality (VR), digital media, interactive applications, and creative uses of artificial intelligence and other emerging technologies. Governance and Smart Community Innovation – This sector focuses on technology-driven solutions that improve public services, governance, and community development. Ideas may include e-governance platforms, smart community systems, digital public services, citizen reporting applications, community information systems, disaster response technologies, and solutions that promote more efficient and responsive local government services.
Technical Execution & Prototype Functionality	25%	Assesses how effectively the team develops a working, functional, and technically sound prototype that demonstrates the proposed solution.
Tech-Business Viability & Innovation	20%	Assesses the innovation, originality, technical potential, and business viability of the proposed solution, including its potential for real-world application and sustainability.
User Interface (UI) & User Experience (UX)	15%	Assesses the design, usability, accessibility, and overall user experience of the prototype.
Pitch Presentation & Live Demo	15%	team's clarity, effectiveness, and confidence in presenting the solution , including the quality and functionality of the live demonstration.
TOTAL	100%	

X. Scoring Rubrics

a. Initial Screening

Criteria	Excellent	Good	Fair	Poor
Team Capability & Technical Skills (25%)	21-25 Team demonstrates highly relevant technical skills, experience, and complementary expertise.	16-20 Team demonstrates relevant skills and sufficient technical capability.	11-15 Team has some relevant skills but with noticeable gaps.	0-10 Team lacks relevant skills or technical capability.
Problem Identification & Relevance (25%)	21-25 Clearly identifies a significant, well-defined, and highly relevant problem.	16-20 Identifies a relevant and clearly defined problem.	11-15 Problem is somewhat relevant but lacks clarity or sufficient detail.	0-10 Problem is unclear, poorly defined, or has limited relevance.
Proposed Solution & Innovation (20%)	17-20 Presents a highly innovative, original, and promising solution to the identified problem.	13-16 Presents a creative and relevant solution with innovative elements.	9-12 Solution is relevant but demonstrates limited innovation or originality.	0-8 Solution lacks innovation, originality, or clear connection to the problem.
Technical & Business Viability (15%)	13-15 Solution demonstrates strong technical feasibility and clear potential for practical application or sustainability.	11-13 Solution is generally feasible and has potential for practical application.	8-10 Feasibility or practical application is uncertain and requires further development.	0-7 Solution is difficult to implement or has little practical potential.
Clarity & Completeness of Submission (15%)	13-15 Submission is complete, well-organized, clear, and	11-13 Submission is complete and generally clear and	8-10 Submission is partially complete or lacks clarity in	0-7 Submission is incomplete, unclear, or poorly

	professionally presented.	organized.	some areas.	organized.
TOTAL - 100				

b. Final Judging

Criteria	Excellent	Good	Fair	Poor
Relevance to the Theme 25%	21-25 Solution directly and comprehensively addresses the Hackathon theme/problem with a clear and meaningful approach.	16-20 Solution clearly addresses the theme/problem with minor gaps.	11-15: Solution is somewhat relevant but has limited connection to the theme/problem.	10 & below Solution has little or no clear connection to the theme/problem.
Technical Execution & Prototype Functionality 25 %	21-25 Prototype is highly functional, technically sound, and effectively demonstrates the proposed solution with minimal or no issues.	16-20 Prototype is functional and demonstrates most key features, with minor technical issues.	11-15 Prototype has limited functionality and demonstrates only some of the proposed features.	10 & below Prototype is largely non-functional or fails to demonstrate the proposed solution.
Tech-Business Viability & Innovation 20%	18-20 Solution is highly innovative, technically viable, scalable, and has strong potential for real-world application or commercialization.	16-17 Solution demonstrates innovation and good potential for practical or business application.	13-15 Solution shows some innovation but has significant limitations in technical or business viability.	12 & below Solution demonstrates little innovation and has limited practical or business potential.
User Interface (UI) & User Experience	14-15 Interface is	12-13 Interface is	10-11 Interface is usable	9 & below Interface is difficult

(UX) 15%	intuitive, accessible, visually coherent, easy to navigate, and provides an excellent user experience.	user-friendly and functional with minor usability or design issues.	but has noticeable issues in navigation, design, or user experience.	to use, confusing, or lacks essential usability considerations.
Pitch Presentation & Live Demo 15%	14–15 Presentation is clear, compelling, well-structured, and delivered confidently; live demo effectively demonstrates the solution and handles questions well.	12–13 Presentation is clear and organized; demo demonstrates the main features with minor issues.	10–11 Presentation communicates the basic concept but lacks clarity, organization, or effective demonstration.	9 & below Presentation is unclear or poorly organized, and the demo fails to effectively demonstrate the solution.
Total – 100%				

XI. Tie - Breaking Rule

Initial Screening

In the event of a **tie in the final scores**, the winner shall be determined **based on the higher score in the following criteria, in order of priority**:

1. **Team Capability & Technical Skills**
2. **Problem Identification & Relevance**
3. **Proposed Solution & Innovation**
4. **Technical & Business Viability**
5. **Clarity & Completeness of Submission**

If a tie still exists after applying the above criteria, the Screening Panel shall deliberate and determine the winner based on the overall merit of the proposed idea, in accordance with the Guidelines and Mechanics. The decision of the Screening Panel shall be final and irrevocable.

Final Judging

In the event of a **tie in the final scores**, the winner shall be determined **based on the higher score in the following criteria, in order of priority**:

1. **Relevance to the Theme**
2. **Technical Execution & Prototype Functionality**
3. **Tech-Business Viability & Innovation**
4. **User Interface (UI) & User Experience (UX)**
5. **Pitch Presentation & Live Demo**

If a tie still exists after applying the above criteria, the Board of Judges shall deliberate based on the overall merit of the proposed solution, technical feasibility, functionality, innovation, potential impact, and the team's overall presentation and demonstration. The decision of the Panel of Judges shall be final and irrevocable.

XII. Prizes and Recognition

The following awards shall be given:

Award	Prize
Champion	₱10,000
First Runner-Up	₱5,000
Second Runner-Up	₱3,000

Awardees shall also receive **medals**. The awarding ceremony shall be held in the last week of October as part of the Marinduque Innovation Fest 2026.

All shortlisted qualifiers who successfully present their research during the event will receive a Certificate of Participation to acknowledge their contribution to the event.

XIII. Conflict of Interest and Impartiality

- All judges and screeners shall be required to declare any actual, potential, or perceived conflict of interest involving a participating team.
- A judge/screener with a conflict of interest shall recuse themselves from evaluating the concerned entry, subject to the procedures determined by the organizers.
- Judges and screeners shall evaluate entries independently and shall not disclose or discuss their scores with other evaluators during the evaluation period.
- Initial screening scores shall remain confidential and shall not be used by the final judges in determining the winners.

XIV. Organizer's Decision

The organizers reserve the right to:

1. Verify the authenticity, originality, and compliance of submitted entries;
2. Request additional documentation or evidence from participating teams;
3. Disqualify entries found to be in violation of these Guidelines and Mechanics;
4. Make necessary interpretations or clarifications regarding provisions not specifically covered herein; and
5. Take appropriate action in cases of unforeseen circumstances affecting the conduct of the competition.

All decisions of the organizers concerning eligibility, compliance, and contest administration shall be final. The decision of the Final Judging Panel regarding the ranking of finalists shall be final and irrevocable, subject to verification of compliance with the competition rules.

XV. Timeline

DATE	ACTIVITY
October 6, 2026	Registration Deadline
October 8, 2026	Webinar Bootcamp
October 16, 2026	Deadline for submission of final proposal and required documents

October 17–20, 2026	Initial screening and evaluation
October 21, 2026	Announcement/notification of five (5) finalists

XVI. Contact Information

For questions regarding the submission guidelines or the iHub launch event, please contact:

MARINDUQUE INNOVATION FEST 2026

Innovation Fest Idea Pitching

Theme:

“Imagine. Innovate. Impact: Building a Smarter Marinduque”

I. Program Description

The **Idea Pitching Competition** is a platform for student innovators to present creative and innovative solutions to local challenges and opportunities in Marinduque. Under the theme “*Imagine. Innovate. Impact: Building a Smarter Marinduque*,” participants will pitch their ideas to a panel of judges, highlighting their solution’s potential impact, feasibility, and sustainability. The activity aims to inspire innovation, entrepreneurship, and problem-solving among Marinduqueño youth.

II. Objectives:

- To foster a culture of research-backed innovation and practical problem-solving;
- To provide a platform for proponents to transform academic studies into tangible, deployable solutions;
- To connect researchers and innovators with industry experts for potential mentorship and development.

III. Eligibility

- Open to all currently enrolled undergraduate students in college and high school.
- Proponents may apply as individuals or in teams of up to three (3) members.
- The team should determine one (1) faculty coach or adviser.
- The coach will only provide mentorship and guidance throughout the competition.
- Submissions must represent original research or conceptualized prototypes developed by the proponents.
- The group should submit **only one (1) entry** to participate in the competition.
- Each team shall designate one member as its **Team Leader/Authorized Representative**, who will serve as the primary contact person for the organizers.
- Participants must accomplish the official registration form and submit all required documents within the prescribed deadlines.
- Employees of DOST and members of the organizing committee are not eligible to join.

IV. Contest Theme

The Idea Pitching Competition will focus on the following areas:

- Agriculture and Food Innovation; Disaster Risk Reduction and Climate Change Adaptation; Blue Economy and Marine Innovation; Digital Technology and AI; Health and Wellness Innovation; Tourism and Cultural Innovation; Creative Technology and E-Games; and Governance and Smart Communities.

V. Contest Mechanics

A. Registration

1. Interested teams shall register through the **official registration form on or before October 6, 2026.**
2. Each group shall submit the names and contact details of its three (3) members.
3. Student participants **below 18 years old shall submit the required Parent/Guardian Consent Form.**
4. Only one person (the designated Team Leader) is allowed to register the entire team using the provided form
5. **Registration link:** <https://forms.gle/oSps4BPjbXm73TQ49>

B. Entry Submission

1. Proposal and Poster Requirements & Format

- All submissions must adhere to standard academic writing conventions and include the following sections.
 - Document Format:
 - Paper Size: A4 paper
 - Font: Time New Roman, 12 pt.
 - Spacing and Margins: Double Spacing, standard 1-inch margins
 - File Format: Must be in PDF format.
 - Proposal Structure:
 - Title Page: Project title, team name, and contact details of all members.
 - Abstract: A brief overview of the problem, the proposed solution, and the target impact.
- Each participating team shall create and submit a **promotional poster showcasing their proposed idea or solution.** The poster must effectively communicate the **value, key features, and benefits** of the proposed idea and should be designed to capture the attention of the target audience.
 - The poster must be in **portrait orientation with a size of 2 feet × 3 feet (24 × 36 inches).**
 - **Submission Format:** .PNG, to ensure better image quality and sharper text and graphics.
 - The poster should prominently feature the **title of the proposed idea, key visuals, a brief description of the solution, its key features or benefits, and other relevant information** that will help promote and communicate the concept. The final poster must be submitted as a **high-resolution image suitable for printing and digital presentation.**
- **Submission link:** <https://forms.gle/BS29eNNmFZ4uAVgk7>
- **Deadline: October 16, 2026**
- Late submissions will not be accommodated to ensure ample time for the screening process.

C. Use of Artificial Intelligence (AI). Entries that are entirely generated or significantly assisted by artificial intelligence (AI) are strictly prohibited. However, limited use of AI tools for minor enhancements may be allowed, provided that the final output is primarily the result of the participant's own creativity and effort.

Participants who use AI in any part of their entry must ensure that its application adheres to the

following ethical standards:

- Clearly disclose all AI tools or models used, including their specific function or purpose, in the official submission form;
- Ensure that the entry reflects originality and substantial creative input beyond AI-generated content;
- Guarantee that any AI-generated elements do not infringe on intellectual property rights; and
- Comply with a content review process, during which the Organizing Committee may request additional documentation or clarification regarding the extent of AI usage.

The Organizing Committee reserves the right to disqualify any entry that fails to meet these ethical guidelines.

Use of AI may also affect the evaluation of entries. Point deductions, if applicable, shall be at the sole discretion of the judges based on the degree of AI involvement and its impact on the originality and creative quality of the entry.

D. Initial Screening

1. All submitted entries shall undergo an initial screening by the designated **Initial Screening Panel/Organizing Committee**.
2. The purpose of the initial screening is to identify the **Top Five (5) Finalists**.
3. The initial screening will use a standardized scoring rubric.
4. Whenever practicable, entries shall be identified by **entry codes rather than team names, schools, or participant names** during scoring to minimize bias.
5. Initial screening scores shall not be disclosed to the final judges.
6. The **five (5) entries with the highest consolidated scores** shall advance as finalists.
7. The organizers shall notify the selected and non-selected groups on **October 21, 2026**.

The initial screening shall focus on the overall merit and suitability of the entries for advancement to the final round.

Criteria	Weight
Relevance and Significance	25%
Innovativeness and Originality	25%
Potential Impact and Value	25%
Clarity and Completeness of the Concept	15%
Compliance with Submission Requirements	10%
TOTAL	100%

The initial screening panel shall use a common scoring guide to promote consistency among evaluators.

E. Webinar Bootcamp Attendance

- Registered participants **must attend the Webinar Bootcamp on Design Thinking and Idea Pitching**. The bootcamp will be organized by the Organizing Committee, and the details will be provided once finalized.
- The bootcamp will be conducted on either **October 8, 2026**. Final details will be communicated via email.
- Teams may refine and enhance their concepts based on the knowledge and insights gained during the bootcamp. The **final proposal must be submitted on October 16, 2026**. After the submission deadline, **no changes, revisions, or introduction of new concepts will be allowed**.

F. Pitching Proper

- Finalists will present their idea live before the Board of Judges and an audience during the Marinduque Innovation Fest 2026.
- Each team must prepare a Five-Slide Pitch Deck containing:
 - i. Title and Team Information
 - ii. Problem Statement and Target Beneficiaries
 - iii. Proposed Solution
 - iv. Science, Technology, and Innovation (STI) Component; and
 - v. Expected Community Impact.
- The concept presented during the Pitching Proper must be consistent with the final proposal submitted on **October 16, 2026**.
- Each finalist/team will be given a fixed time for the pitch presentation, followed by an open forum/question-and-answer portion with the judges.
 - Seven (7) minutes for the Innovation Pitch; and
 - Thirteen (13) minutes for the Question-and-Answer Session.
- The use of prototypes, demonstration models, videos, and other supporting materials shall be optional and shall not form part of the evaluation criteria.
- The order of pitching will be determined by a random draw or as communicated by the organizers prior to the event.

G. Final Judging

1. **The five (5) finalists** shall proceed to the final judging which will be conducted in the last week of October.
2. Final judging shall be conducted by a separate set of judges.
3. Final judges shall independently evaluate the five teams using the official final judging rubric.
4. Final judges shall not be provided with the initial screening scores.
5. The final judging results shall determine the Champion, First Runner-Up, and Second Runner-Up.
6. The decision of the final judging panel, subject to the official rules and procedures, shall be final.

The five finalists shall be evaluated based on the following:

Criteria	Weight	
Relevance to the theme: - Agriculture & Food Innovation - Disaster Risk Reduction/ Climate Change Adaptation - Blue Economy & Marine Innovation - Digital Technology & AI - Health & Wellness Innovation - Tourism & Cultural Innovation - Creative Technology & E-Games - Governance & Smart Communities	15%	Agriculture and Food Innovation – This sector focuses on innovative solutions that improve agricultural productivity, food production, processing, and sustainability. Ideas may include smart farming technologies, precision agriculture, agricultural automation, food processing and preservation, post-harvest technologies, aquaculture, and the development of value-added agricultural products. Blue Economy and Marine Innovation – This sector focuses on the sustainable

	use, protection, and development of marine and coastal resources. Proposed innovations may address marine aquaculture, fisheries, coastal resource management, marine biodiversity monitoring, ocean technologies, and sustainable livelihood opportunities for coastal communities. Environment and Climate Innovation – This sector encourages solutions addressing environmental challenges, climate change, and disaster risks. Ideas may include waste management, recycling and circular economy initiatives, renewable energy applications, biodiversity conservation, climate change adaptation, disaster risk reduction, and technologies that promote environmental sustainability. Digital Technology and Artificial Intelligence – This sector focuses on the development and application of digital technologies to address real-world problems. Participants may propose innovations involving artificial intelligence, mobile and web applications, Internet of Things (IoT), automation, data analytics, cybersecurity, digital platforms, and other emerging technologies. Health and Wellness Innovation This sector focuses on innovative solutions that improve healthcare services, health monitoring, wellness, and quality of life. Ideas may include digital health applications, remote health monitoring, assistive technologies, community health solutions, nutrition innovations, and technologies that improve access to healthcare services. Tourism and Creative Innovation This sector promotes innovative ideas that enhance tourism, culture, heritage, and creative industries. Proposed solutions may include smart tourism platforms, digital tourism experiences, cultural heritage preservation technologies, augmented or virtual reality applications, creative media, animation, and innovative ways of promoting local destinations and products.
--	--

		Creative Technology and E-Games Innovation – This sector focuses on the use of technology to develop creative digital products and experiences. Participants may propose innovations involving game development, animation, augmented reality (AR), virtual reality (VR), digital media, interactive applications, and creative uses of artificial intelligence and other emerging technologies. Governance and Smart Community Innovation – This sector focuses on technology-driven solutions that improve public services, governance, and community development. Ideas may include e-governance platforms, smart community systems, digital public services, citizen reporting applications, community information systems, disaster response technologies, and solutions that promote more efficient and responsive local government services.
Novelty and Creativity	20%	The originality, uniqueness, and creative approach of the proposed idea in addressing the identified need or problem.
Feasibility and Practicality	20%	The practicality and achievability of implementing the proposed idea considering available resources, technology, and capabilities.
Application of Science, Technology, and Innovation (STI)	15%	The appropriate and meaningful use of science, technology, and innovation in developing or enhancing the proposed solution.
Potential Community Impact	20%	The potential of the proposed idea to provide meaningful, sustainable, and beneficial outcomes to the target community or beneficiaries.
Pitch Delivery and Communication	10%	The clarity, organization, confidence, and effectiveness of presenting and communicating the proposed idea to the judges.
TOTAL	100%	

VI. Scoring Rubrics

Initial Screening Scoring Rubrics

Criteria	Excellent	Good	Fair	Poor
Relevance and Significance (25%)	23–25 Idea is highly relevant to the theme and clearly addresses a significant need, problem, or opportunity.	19–22 Idea is relevant and addresses a meaningful need, problem, or opportunity.	15–18 Idea has some relevance, but its significance or connection to the theme needs further development.	0–14 Idea has limited relevance or its significance is unclear.
Innovativeness and Originality (25%)	23–25 Idea demonstrates a highly innovative, creative, and original approach with clear distinction from existing solutions.	19–22 Idea demonstrates innovation and originality, with some distinctive elements.	15–18 Idea has some innovative elements but is largely based on existing or familiar approaches.	0–14 Idea shows minimal innovation or originality.
Potential Impact and Value (25%)	23–25 Idea shows strong potential to create meaningful benefits and generate significant value for its intended beneficiaries or users.	19–22 Idea shows good potential for positive impact and provides clear value to its intended beneficiaries or users.	15–18 Potential impact and value are evident but limited or insufficiently developed.	0–14 Potential impact or value is minimal or unclear.

Clarity and Completeness of the Concept (15%)	14–15 Concept is exceptionally clear, well-organized, and sufficiently developed, making the idea easy to understand.	11–13 Concept is clear and adequately developed, with only minor gaps in information.	7–10 Concept is understandable but lacks important details or development.	0–6 Concept is unclear, incomplete, or difficult to understand.
Compliance with Submission Requirements (10%)	9–10 Fully complies with all prescribed submission requirements and provides all required information and documents.	8 Substantially complies with the requirements, with only minor deficiencies.	6–7 Some requirements are met, but several deficiencies or omissions are present.	0–5 Fails to meet significant submission requirements or has substantially incomplete requirements.

Final Judging Scoring Rubrics

Criteria	Excellent	Good	Fair	Poor
Relevance to the Theme (15%)	14–15 Idea strongly and clearly aligns with the contest theme and addresses a relevant local need, issue, or opportunity.	11–13 Idea clearly relates to the theme and addresses a relevant concern or opportunity.	7–10 Idea has some connection to the theme, but the relevance could be strengthened.	0–6 Idea has little or no clear connection to the theme.

Novelty and Creativity (20%)	18–20 Presents a highly original, creative, and distinctive idea or approach with clear potential to offer something new.	15–17 Demonstrates creativity and originality, with some distinctive elements.	11–14 Contains some creative elements but is largely based on existing or familiar ideas.	0–10 Shows limited originality or creativity and offers little distinction from existing ideas.
Feasibility and Practicality (20%)	18–20 Idea is highly feasible and practical, with a clear and realistic approach to implementation, resources, and target beneficiaries.	15–17 Idea is generally feasible and practical, with a reasonable implementation approach.	11–14 Idea shows potential feasibility but has significant gaps in implementation, resources, or execution.	0–10 Idea is difficult to implement or lacks a realistic approach to execution.
Application of Science, Technology, and Innovation (STI) (15%)	14–15 STI is meaningfully and effectively integrated as a key component of the proposed solution.	11–13 STI is appropriately incorporated and contributes to addressing the identified need or problem.	7–10 STI application is present but limited or insufficiently developed.	0–6 Little or no meaningful application of STI is demonstrated.
Potential Community Impact (20%)	18–20 Demonstrates strong potential to create meaningful, sustainable, and measurable benefits for the target community or beneficiaries.	15–17 Shows good potential to provide meaningful benefits to the target community or beneficiaries.	11–14 Potential benefits are evident but limited in scope or insufficiently developed.	0–10 Potential community benefits are minimal, unclear, or difficult to establish.

Pitch Delivery and Communication (10%)	9–10 Pitch is clear, confident, engaging, well-organized, and effectively communicates the idea within the allotted time. Questions are addressed clearly and appropriately.	8 Pitch is clear and organized, with effective communication and generally adequate responses to questions.	6–7 Pitch communicates the basic idea but has issues with clarity, organization, confidence, or time management.	0–5 Pitch is unclear, poorly organized, difficult to follow, or does not effectively communicate the proposed idea.
--	---	--	---	--

VII. Tie - Breaking Rule

Initial Screening

In the event of a **tie in the final scores**, the winner shall be determined **based on the higher score in the following criteria, in order of priority**:

1. Relevance and Significance
2. Innovativeness and Originality
3. Potential Impact and Value
4. Clarity and Completeness of the Concept
5. Compliance with Submission Requirements

If a tie still exists after applying the above criteria, the Screening Panel shall deliberate and determine the winner based on the overall merit of the proposed idea, in accordance with the Guidelines and Mechanics. The decision of the Screening Panel shall be final and irrevocable.

Final Judging

In the event of a **tie in the final scores**, the winner shall be determined **based on the higher score in the following criteria, in order of priority**:

1. Novelty and Creativity
2. Feasibility and Practicality
3. Potential Community Impact
4. Relevance to the theme
5. Application of Science, Technology, and Innovation (STI)
6. **Pitch delivery and communication**

If a tie still exists after applying the above criteria, the Board of Judges shall deliberate based on the overall merit, feasibility, and potential impact of the proposed ideas, as well as the teams' overall pitching performance. The decision of the Panel of Judges shall be final and irrevocable.

VIII. Prizes and Recognition

The following awards shall be given:

- Champion: ₱10,000
- 2nd Place: ₱5,000

- 3rd Place: ₱3,000

Awardees shall also receive **medals**. The awarding ceremony shall be held in the last week of October as part of the Marinduque Innovation Fest 2026.

All shortlisted qualifiers who successfully present their research during the event will receive a Certificate of Participation to acknowledge their contribution to the event.

IX. Conflict of Interest and Impartiality

- All judges and screeners shall be required to declare any actual, potential, or perceived conflict of interest involving a participating team.
- A judge/screener with a conflict of interest shall recuse themselves from evaluating the concerned entry, subject to the procedures determined by the organizers.
- Judges and screeners shall evaluate entries independently and shall not disclose or discuss their scores with other evaluators during the evaluation period.
- Initial screening scores shall remain confidential and shall not be used by the final judges in determining the winners.

X. Organizer's Decision

The organizers reserve the right to:

1. Verify the authenticity, originality, and compliance of submitted entries;
2. Request additional documentation or evidence from participating teams;
3. Disqualify entries found to be in violation of these Guidelines and Mechanics;
4. Make necessary interpretations or clarifications regarding provisions not specifically covered herein; and
5. Take appropriate action in cases of unforeseen circumstances affecting the conduct of the competition.

All decisions of the organizers concerning eligibility, compliance, and contest administration shall be final. The decision of the Final Judging Panel regarding the ranking of finalists shall be final and irrevocable, subject to verification of compliance with the competition rules.

MARINDUQUE INNOVATION FEST 2026

Kuwentolohiya: A Short Video Contest

Theme:

“Likha ng Marinduque: Kuwento, Kultura, at Teknolohiya”

I. Program Description

KWENTOLOHIYA is a short video contest that brings together three interconnected elements—Kuwento, Kultura, and Teknolohiya—to showcase the unique identity, experiences, and creativity of Marindukeños.

The contest recognizes **kwento or stories** as a means of expressing experiences, perspectives, and aspirations; **kultura or culture** as the traditions, practices, heritage, and identity that shape the community; and **teknolohiya or technology** as an enabler that provides new and innovative ways to create, preserve, interpret, and share these stories.

Through short-form video storytelling, participants are encouraged to explore how technology can help bring cultural stories to life, how stories can deepen appreciation of local culture, and how culture can inspire the creative and meaningful use of technology. The contest aims to demonstrate that when *kwento*, *kultura*, and *teknolohiya* come together, they can create compelling stories that connect Marinduque’s heritage with the present and the future.

II. Objectives

The contest aims to:

1. **Showcase meaningful stories of Marinduque** that reflect the experiences, perspectives, aspirations, and identity of its people;
2. **Promote appreciation of Marinduque’s culture and heritage** by highlighting its traditions, practices, people, places, and local identity through creative storytelling;
3. **Demonstrate the role of technology in storytelling and cultural expression**, particularly how digital and emerging technologies can provide innovative ways to create, preserve, and share local stories;
4. **Explore the connection between culture and technology**, showcasing how innovation can help document, interpret, promote, and sustain cultural heritage;
5. **Encourage creative and responsible use of technology** as a tool for expressing stories and perspectives about Marinduque; and
6. **Inspire participants to connect the past, present, and future of Marinduque** by using storytelling and technology to celebrate its culture while imagining new possibilities for the community.

III. Eligibility

- The competition is open to groups who wish to participate in the Marinduque Innovation Fest 2026.
- Each participating group shall consist of **three (3) members, regardless of age**, accompanied by one (1) faculty coach or adviser.
- The coach will only provide mentorship and guidance throughout the competition.
- Only one (1) entry can be submitted per team for the competition.
- **Participants below 18 years old must submit a duly accomplished Parent/Guardian Consent**

Form.

- **A participant may belong to only one (1) team.**
- The group should submit **only one (1) entry** to participate in the competition.
- Each team shall designate one member as its **Team Leader/Authorized Representative**, who will serve as the primary contact person for the organizers.
- Groups may consist of participants from different schools, organizations, communities, or backgrounds.
- Participants must **accomplish the official registration form and submit all required documents** within the prescribed deadlines.
- Employees of DOST and members of the organizing committee are not eligible to join.
- **Entries commissioned by third parties, as well as those that have received grants or awards from other competitions are strictly prohibited.**
- By submitting an entry, participants agree to abide by these Guidelines and Mechanics and the decisions of the organizers and judges.

IV. Contest Theme

Theme: “Likha ng Marinduque: Kuwento, Kultura, at Teknolohiya”

Entries should present an original and meaningful interpretation of what makes Marinduque unique by connecting:

- **Kuwento** – stories, experiences, perspectives, memories, aspirations, and voices of Marinduqueños;
- **Kultura** – traditions, practices, heritage, people, places, arts, local identity, and ways of life; and
- **Teknolohiya** – digital tools, creative technologies, emerging technologies, and innovative approaches used to create, preserve, interpret, or share the story.

The creative interpretation of the theme shall be left to the participating teams. Entries may be produced using **any creative video format or storytelling style**, provided they clearly communicate the contest theme.

V. Contest Mechanics

A. Registration and Concept Submission

- f) Interested teams shall register through the **official registration form on or before October 6, 2026.**
- g) Each group shall submit the names and contact details of its three (3) members.
- h) Student participants **below 18 years old shall submit the required Parent/Guardian Consent Form.**
- i) Registration shall not be considered complete until all required information and documents have been submitted.
- j) Each team shall submit a **proposed concept** anchored on the theme, “*Likha ng Marinduque: Kuwento, Kultura, at Teknolohiya.*”
- k) The proposed concept shall include:

- a. Working title;
 - b. Story/topic to be featured;
 - c. Cultural element or aspect of Marinduque to be highlighted;
 - d. How technology will be incorporated; and
 - e. Intended message or purpose.
- l) The concept submission is intended to establish the team's proposed direction and shall not replace the final video submission.

B. Video Creation

- **Video entry must be original work created by the participants.** Plagiarism or any form of copyright infringement shall result in immediate disqualification.
- Only registered groups may produce and submit an official contest entry.
- The video may be in **Filipino, English, or any local dialect.** Entries using local dialects must include Filipino or English subtitles.
- The use of copyrighted music, images, video clips, or other materials **without proper authorization is prohibited.**
- Entries **must not contain offensive, defamatory, discriminatory, political campaign, or commercial promotional content.**
- Participants are responsible for securing permission from individuals, locations, organizations, or communities featured in their videos when such permission is necessary.
- Participants may use available digital tools and technologies in producing their videos, including editing software, animation, graphics, visual effects, sound design, and other appropriate technologies.
- The Organizing Committee reserves the right to request raw footage or editable files to verify originality.
- By submitting an entry, participants grant DOST-MIMAROPA (DOST Marinduque) the non-exclusive right to use, reproduce, and publish the submitted video for educational, promotional, and non-commercial purposes with proper acknowledgment of the creator.

C. Use of Artificial Intelligence (AI). Entries that are entirely generated or significantly assisted by artificial intelligence (AI) are strictly prohibited. However, limited use of AI tools for minor enhancements may be allowed, provided that the final output is primarily the result of the participant's own creativity and effort.

Acceptable enhancements may include, but are not limited to:

- Basic color correction and lighting adjustments;
- Noise reduction and image sharpening;
- Grammar and spell checking;
- Layout alignment or formatting aids;
- Caption or subtitle generation (with participant review and editing); and
- Transcription support for audio or video entries.

Participants who use AI in any part of their entry must ensure that its application adheres to the following ethical standards:

- Clearly disclose all AI tools or models used, including their specific function or purpose, in the official submission form;

- Ensure that the entry reflects originality and substantial creative input beyond AI-generated content;
- Guarantee that any AI-generated elements do not infringe on intellectual property rights; and
- Comply with a content review process, during which the Organizing Committee may request additional documentation or clarification regarding the extent of AI usage.

The Organizing Committee reserves the right to disqualify any entry that fails to meet these ethical guidelines.

Use of AI may also affect the evaluation of entries. Point deductions, if applicable, shall be at the sole discretion of the judges based on the degree of AI involvement and its impact on the originality and creative quality of the entry.

VI. Video Specifications

Each submitted video must meet the following specifications:

- **Maximum duration: Five (5) minutes**, including opening and closing credits.
- **File format: MP4 or MOV**
- **Recommended resolution: Minimum 1080p (Full HD)**
- **Orientation: Landscape (16:9).**
- **Language:** Filipino, English, or local dialect (with subtitles, if applicable)
- **Entries exceeding five (5) minutes will have corresponding deductions from their points (1 point per every second excess)**
- The video must have a title and appropriate credits.
- Any third-party material requiring attribution shall be properly acknowledged in the credits.
- The video must not contain obscene, defamatory, discriminatory, hateful, or otherwise inappropriate content.
- The video must not violate copyright, intellectual property, privacy, or other applicable laws and regulations.
- The submitted video must be the team's **final and complete version**.

VII. Video Poster Submission

Each participating team shall create and submit a video poster featuring their entry. The poster must be in **portrait orientation with a size of 2 feet × 3 feet (24 × 36 inches)**.

Submission Format: .PNG, to ensure better image quality and sharper text and graphics.

The poster should prominently feature the video title, key visuals, and other relevant video information. Submit the final poster as a high-resolution image suitable for printing and digital presentation.

VIII. Submission Requirements

Each team must submit the following:

A. Registration Stage — Deadline: October 6, 2026

- Accomplished **Registration Form**;
- Names and details of the three team members;
- Team Leader/Authorized Representative;
- **Parent/Guardian Consent Form** for participants below 18 years old; and
- Proposed concept anchored on the official theme.
- **Registration link:** <https://forms.gle/z6KGX7EyQR2zvKZt8>

B. Final Video Submission — Deadline: October 16, 2026

- **Final video** in MP4 or MOV format;
- **Final poster** in PNG format;
- Team member information; and
- Other documents/forms required by the organizers.
- **Submission link:** <https://forms.gle/VPw1vF2zuLj2RpSY7>

The organizers shall provide official templates for the **Parent/Guardian Consent Form**.

VIII. Judging Criteria

The competition shall follow a **two-stage judging process**:

Stage 1: Initial Screening

- All submitted entries shall undergo an initial screening by the designated **Initial Screening Panel/Organizing Committee**.
- The purpose of the initial screening is to identify the **Top Five (5) Finalists**.
- The initial screening will use a standardized scoring rubric.
- Whenever practicable, entries shall be identified by **entry codes rather than team names, schools, or participant names** during scoring to minimize bias.
- Initial screening scores shall not be disclosed to the final judges.
- The **five (5) entries with the highest consolidated scores** shall advance as finalists.
- The organizers shall notify the selected and non-selected groups on **October 21, 2026**.

The initial screening shall focus on the overall merit and suitability of the entries for advancement to the final round.

Criteria	Weight
Strength and Relevance of Story/Concept	25%
Storytelling and Creativity	25%
Integration of Kuwento, Kultura, at Teknolohiya	20%
Technical/Visual and Audio Execution	15%
Compliance with Submission Requirements	15%
TOTAL	100%

The initial screening panel shall use a common scoring guide to promote consistency among evaluators.

Stage 2: Final Judging

- The **five (5) finalists** shall proceed to the final judging which will be conducted in the last week of October.
- Final judging shall be conducted by a separate set of judges.
- Final judges shall independently evaluate the five finalist videos using the official final judging rubric.
- Final judges shall not be provided with the initial screening scores.
- The final judging results shall determine the Champion, First Runner-Up, and Second Runner-Up.
- The decision of the final judging panel, subject to the official rules and procedures, shall be final.

The five finalists shall be evaluated based on the following:

Criteria	Weight
Storytelling and Impact	30%
Representation of Marinduque Culture and Identity	25%

Meaningful Integration of Technology	20%
Creativity and Originality	15%
Technical Execution and Overall Production Quality	10%
TOTAL	100%

The final judging shall focus on the overall quality, originality, creativity, and impact of the completed video.

IX. Scoring Rubrics

Initial Screening Scoring Rubrics

Criteria	Excellent	Good	Fair	Poor
Strength and Relevance to the theme (25%)	23–25 Clearly and strongly reflects the theme, integrating Marinduque's stories, culture, and/or technology in a meaningful concept.	19–22 Theme is clearly evident with minor gaps in connection or development.	15–18 Theme is partially addressed but the concept needs stronger alignment.	0–14 Theme is unclear, weakly connected, or unrelated.
Storytelling and Creativity (25%)	23–25 Highly creative concept with a compelling, original, and engaging story or narrative approach.	19–22 Creative and engaging with some original storytelling elements.	15–18 Some creative elements are present, but the story or concept is predictable or underdeveloped.	0–14 Limited creativity; concept or storytelling is unclear, generic, or incomplete.
Integration of Kuwento, Kultura, at Teknolohiya (20%)	18–20 Three elements are clearly and meaningfully interconnected.	15–17 Strong integration with minor weaknesses.	11–14 Elements are present but not fully integrated.	0–10 One or more core elements are substantially absent.
Technical/Visual and Audio Execution (15%)	14–15 Concept demonstrates strong potential for excellent visuals, audio, editing, pacing, and overall production.	11–13 Good technical and production approach with minor areas for improvement.	7–10 Basic technical approach with noticeable limitations in visuals, audio, or editing.	0–6 Weak or impractical technical approach that may significantly affect the final output.
Compliance with Submission Requirements (15%)	14–15 Complete and fully compliant.	11–13 Minor deficiencies that do not substantially affect eligibility.	7–10 Several deficiencies requiring clarification.	0–6 Does not substantially comply.

Final Judging Scoring Rubrics

Criteria	Excellent	Good	Fair	Poor
Storytelling and Impact (30%)	27–30 Exceptionally compelling, coherent, memorable, and impactful.	23–26 Very strong storytelling with clear impact.	19–22 Adequate but lacks depth or impact.	0–18 Weak, unclear, or ineffective storytelling.
Representation of Marinduque Culture and Identity (25%)	23–25 Authentic, respectful, insightful, and highly meaningful.	19–22 Relevant but relatively superficial.	15–18 Limited cultural connection.	0–14 Minimal, inaccurate, or inappropriate representation.
Meaningful Integration of Technology (20%)	18–20 Technology is innovative, purposeful, and integral to the story.	15–17 Technology is present but could be better integrated.	11–14 Limited or mostly decorative use.	0–10 Technology has little or no meaningful role.
Creativity and Originality (15%)	14–15 Highly original and distinctive.	11–13 Creative with some original elements.	7–10 Limited originality.	0–6 Little evidence of creative treatment.
Technical Execution and Overall Production Quality (10%)	9–10 Excellent technical execution.	8 Good and functional.	6–7 Noticeable technical weaknesses.	0–5 Significant technical problems affecting the viewing experience.

XI. Tie - Breaking Rule

Initial Screening

In the event of a **tie in the final scores**, the winner shall be determined **based on the higher score in the following criteria, in order of priority**:

- **Strength and Relevance of Story/Concept**
- **Storytelling and Creativity**
- **Integration of Kuwento, Kultura, at Teknolohiya**
- **Technical/Visual and Audio Execution**
- **Compliance with Submission Requirements**

If a tie still exists after applying the above criteria, the Screening Panel shall deliberate and determine the winner based on the overall effectiveness of the entry in promoting the contest theme. The decision of the Screening Panel shall be final and irrevocable.

Final Judging

In the event of a **tie in the final scores**, the winner shall be determined **based on the higher score in the following criteria, in order of priority**:

1. **Storytelling and Impact**
2. **Representation of Marinduque Culture and Identity**
3. **Meaningful Integration of Technology**
4. **Creativity and Originality**
5. **Technical Execution and Overall Production Quality**

If a tie still exists after applying the above criteria, the Board of Judges shall deliberate and determine the winner based on the overall effectiveness of the entry in promoting the contest theme. The decision of the Board of Judges shall be final and irrevocable.

XII. Awards

The following awards shall be given:

Award	Prize
Champion	₱10,000
First Runner-Up	₱5,000
Second Runner-Up	₱3,000

Awardees shall also receive **medals**. The awarding ceremony shall be held in the last week of October as part of the Marinduque Innovation Fest 2026.

All shortlisted qualifiers who successfully present their video during the event will receive a Certificate of Participation to acknowledge their contribution to the event.

XIII. Conflict of Interest and Impartiality

- All judges and screeners shall be required to declare any actual, potential, or perceived conflict of interest involving a participating team.
- A judge/screener with a conflict of interest shall recuse themselves from evaluating the concerned entry, subject to the procedures determined by the organizers.
- Judges and screeners shall evaluate entries independently and shall not disclose or discuss their scores with other evaluators during the evaluation period.
- Initial screening scores shall remain confidential and shall not be used by the final judges in determining the winners.

XIV. Organizer's Decision

The organizers reserve the right to:

- Verify the authenticity, originality, and compliance of submitted entries;
- Request additional documentation or evidence from participating teams;
- Disqualify entries found to be in violation of these Guidelines and Mechanics;
- Make necessary interpretations or clarifications regarding provisions not specifically covered herein; and
- Take appropriate action in cases of unforeseen circumstances affecting the conduct of the competition.

All decisions of the organizers concerning eligibility, compliance, and contest administration shall be final. The decision of the Final Judging Panel regarding the ranking of finalists shall be final and irrevocable, subject to verification of compliance with the competition rules.

XV. Timeline

DATE	ACTIVITY
October 6, 2026	Registration and submission of proposed video concept
October 16, 2026	Deadline for submission of final video and required documents
October 17–20, 2026	Initial screening and evaluation
October 21, 2026	Announcement/notification of five (5) finalists

XVI. Contact Information

DOST MARINDUQUE

Email: pstc.marinduque@mimaropa.dost.gov.ph
Facebook: DOST-Provincial S&T Center Marinduque
Tel. No.: (042)-332-0302
Mobile Number: 09670847266

Email: marinduqueihub@gmail.com
Facebook: Marinduque iHub
Tel. No.: (042)-332-0302
Mobile Number: 09670847266

II. Bootcamp

The Marinduque Technology Business Incubator (MTBI) will facilitate a Webinar Bootcamp on Idea Pitching on September 25, 2026, from 9:00 AM to 5:00 PM. All participants across the different Innovation Fest 2026 challenges are encouraged to attend. The bootcamp will provide participants with practical guidance on developing and refining their innovative ideas, structuring compelling pitch presentations, and effectively communicating the value, feasibility, market potential, and anticipated impact of their proposed solutions. The session will also equip participants with techniques for delivering clear, concise, and persuasive pitches in preparation for the Idea Pitching Competition and other challenge presentations.

III. Launching of Marinduque Innovation Hub

The Marinduque Innovation Hub will be officially launched on October 6, 2026, at 8:00 AM at the DOST Marinduque Office, Capitol Compound, Bangbangalon, Boac, Marinduque. The launching ceremony will also feature the Ceremonial Signing of the Memorandum of Understanding (MOU) and Pledge of Commitment with key partners and stakeholders, signifying their shared commitment to supporting the Hub's programs, fostering innovation, and strengthening collaboration within the Marinduque innovation ecosystem.

IV. Tech Talks/Fireside Chats

A series of panel discussions and forums will be conducted at The Nexus Stage, with the first set of sessions facilitated by the Marinduque Technology Business Incubator (MTBI), followed by a second session facilitated by the Marinduque Innovation Hub (iHUB).

V. Exhibits

The event will also feature an exhibition area showcasing various technologies, innovations, and projects from participating partners and stakeholders, including DevCon, E-Rovoutika, Cybercraft PH, startups in Marinduque, the Marinduque Innovation Hub, and Marinduque State University. The exhibit may also accommodate private sector partners and sponsors who wish to showcase their products, services, and technology solutions.

a. Robots Den

Different types of robots will be showcased in the area, featuring robotics competitions, demonstrations, and interactive discussions on robotics and emerging technologies.

b. Gamers Den

All games submitted for the competition will be showcased in this area, allowing participants and visitors to experience and explore the games developed by the contestants.

VI. IMPLEMENTATION TIMELINE AND ASSIGNMENT OF RESPONSIBILITIES

Activity	Schedule	Lead Office	Partner/Supporting Offices	Key Responsibilities
Activity Planning and Coordination	August 17 – 31, 2026	Marinduque iHUB	TBI/MarSU	Overall planning, coordination meetings, development of mechanics, activity design, and implementation guidelines
Call for Entries	Sep 4-23, 2026	Marinduque iHub	TBI/MarSU	Post to social media/Send letter of invitation to schools
Initial Screening	Sept 24-28, 2026	Marinduque iHub	TBI/MarSU	Screening of Participants for the Hackathon, Idea Pitching Competition, LikhAI Short Film Challenge, and E-Game Development Challenge
Invitation of Participants	September	Marinduque iHub TBI/MarSU		Send letters of invitation to participating schools, industry partners, and relevant stakeholders.
Procurement of Materials	September	DOST Marinduque		
Launching of Marinduque iHUB	October 6, 2026	Marinduque iHub		Official launching of Marinduque iHUB at DOST Marinduque, Capitol Compound, Bangbangan, Boac, Marinduque Ceremonial MOU/Pledge of Commitment Signing
Forums and Panel Discussions	October 6, 2026, PM Session October 7, 2026, AM Session	Marinduque iHub TBI/MarSU		October 6, 2026 – PM Session: The Marinduque Technology Business Incubator will facilitate a series of forums, talk shows, and panel discussions featuring relevant topics and resource speakers to promote innovation, entrepreneurship, and

				technology development. October 7, 2026 – AM Session: The Marinduque Innovation Hub (iHUB) will facilitate the conduct of a forum and panel discussion focusing on relevant topics related to innovation, technology, and entrepreneurship.
Marinduque Innovation Fest 2026 Challenge	October 6-8, 2026	Marinduque iHub TBI/MarSU	Industry Experts	Conduct of Innovation Fest Hackathon, Innovation Fest Idea Pitching, Innovation Fest EGames Development Challenge, and Innovation Fest LikhAI Short Film, storytelling short film using AI.
Innovation Exhibits	October 6-8, 2026	Marinduque iHub	TBI/MarSU	The Marinduque Innovation Fest 2026 will feature an exhibit showcasing various technologies, innovations, and solutions from participating organizations, institutions, and stakeholders.

VII. ESTIMATED BUDGET REQUIREMENTS

Summary of Estimated Budget

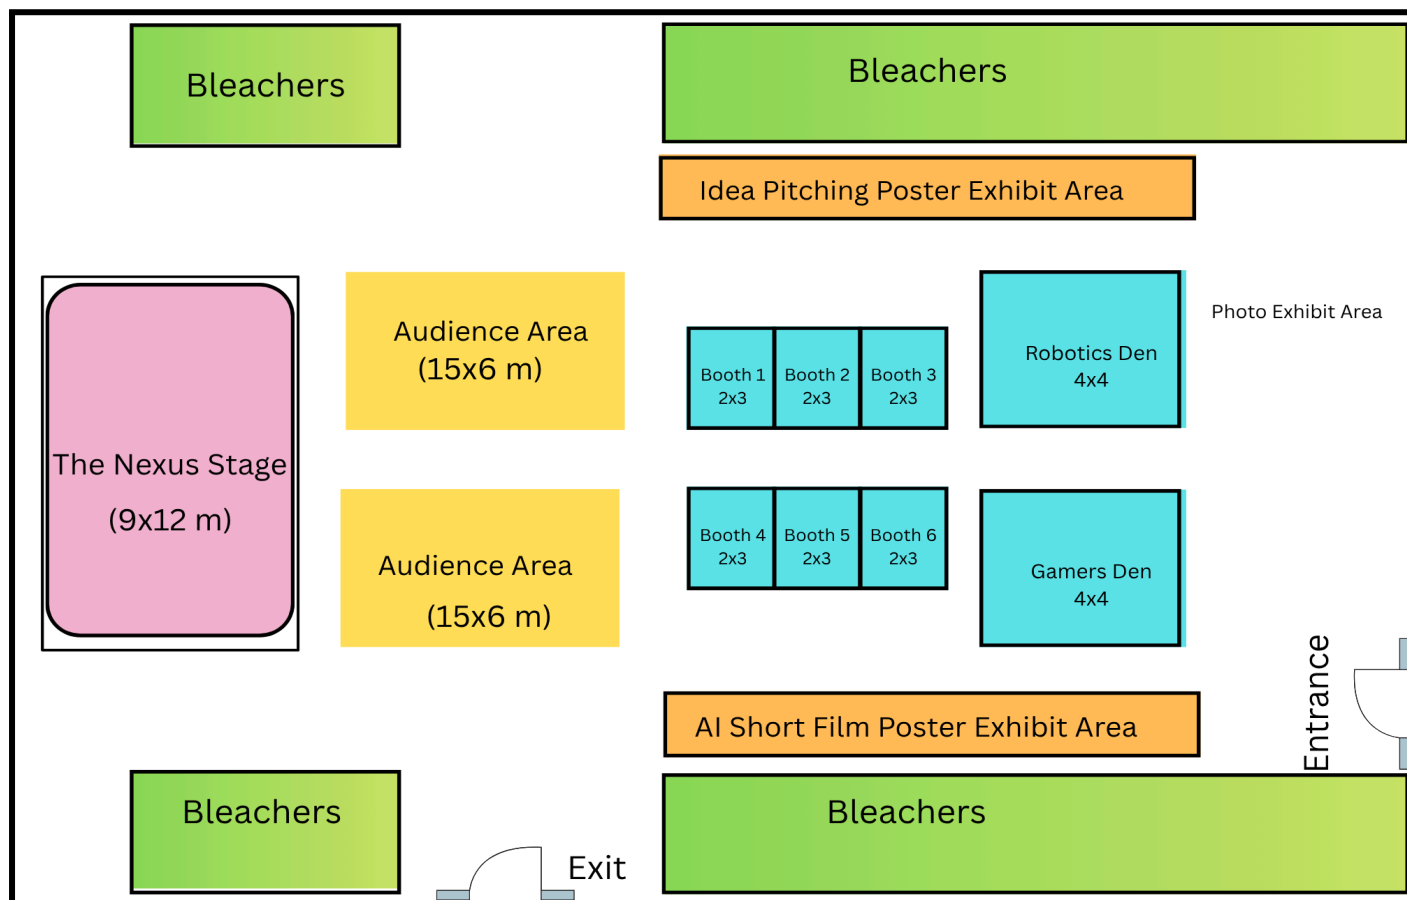

MOOE	Amount	Total Amount	Charging	TBI	Charging
Travelling Expenses (local)	Php 110,000.00	Php 300,000.00	iHUB	Php 46,500.00	MVINET
Representation Expenses	Php 175,000.00			Php 44,000.00	
Printing and Publication Expenses	Php 15,000.00				
Travelling Expenses (local)	Php 135,000.00	Php 243,000.00	GIA-MAR-eTURO		
Rental of LED, Lights and sounds	Php 70,000.00				
Other Supplies and Materials Expenses	Php 38,000.00			Php 3,000.00	MVINET
Venue Design	Php 78,000.00	Php 150,000.00	GIA-MAR-iHUB		
Prizes Expenses	Php 72,000.00				
Venue Design	Php 72,000	Php 107,000.00	SETUP-TTC-MAR		
Rent Motor Vehicle	Php 35,000.00				
Other Professional Services				Php 30,000.00	MVINET
TOTAL	Php 800,000.00			Php 123,500.00
